How To Play

The objective of the game is to out maneuver the opponent's dragon(s). Move behind the enemy and snap at his tail. The first time you land a snap, you will chew his tail off. Dragons with missing tails are weaker and you can attack them from the front or the rear. A weak dragon may regain his tail by snapping another dragon's tail. However, if a weak dragon is bitten again, he dies.

I. INTRODUCTION

Play tag with maze after maze full of dragons. Catch them if you can! Only a dragon's tail is vulnerable, so sneak up from behind and munch till they turn to bones.

If you are fast enough to snatch the Magic Lantern, you can discover the secrets buried within the walls of each maze.

(One Player: Player vs. 3 Dragons)
(Double Players: Both Players vs. 3 Dragons)
(Vs. Mode: Player vs. Player)

Note: For the 2 Players mode, both players must exit the current level to get to the next level.

Start Button: Starts the game. Also freezes the game.

III. HOW TO PLAY

The objective of the game is to out maneuver the opponent's Dragon(s). Move behind the enemy and snap at his tail. The first time you land a snap, you will chew his tail off. Dragons with missing tails are weaker and you can attack them from the front or the rear. A weak dragon may regain his tail by snapping another Dragon's tail. However, if a weak dragon is bitten again, he turns into a skeleton and vanishes. The player must use appropriate tactics by observing each dragon's tail. For example, if dragons of equal tails (strength) approach each other head on, the snapping dragon will defeat the dragon with the closed jaws. But if one has a shorter tail, he cannot defeat the other even if he snaps.

There is a time limit on each level. The time indicator is in the lower left hand corner.

The number of dragons left and the player's score are displayed on the bottom of the screen.

LUCKY CHERRIES

VII. PLAYING HINTS

- 1) Never approach a dragon head on if your dragon has a shorter tail than the other dragon.
- 2) When approaching head on with another dragon of equal tail length, always keep your jaws snapping.
- 3) Wait behind hedges for dragons approaching from the left or the right. At the very moment they pass you, move out and snap at the tip of their tails.
- 4) The best advice is to protect your tail at all times, because it's very hard to grow it back. With a full tailed dragon, you can approach all other dragons head on. Turn around at the right moment and you will find yourself right on the tail of the dragon that just passed you.
